

Pureline Oxygen Concentrator Technology And Anesthesia Machines

Features and Benefits

Oxygen Concentrator

- Extracts FREE medical-grade oxygen from the air
- Pays for itself within 1-3 years (see brochure)
- Energy efficient; average 12 cents a day to operate
- No hoses or regulators to buy, store, or replace—ever!
- No need for expensive copper oxygen line to plumb
- Quiet 40-dBA operation (competition brags about 56 dBA!)
- Easy on/off; controls are large and easily accessible
- Oxygen is “on demand”—never run out of a supply of oxygen
- Simple, durable, maintenance-free valves
- Uses standard E tank for backup and oxygen flush
- Safety alerts; both audible and illuminated for purity and flow rate
- FDA approved, UL tested
- Industry-best 3-Year Warranty
- Made in the USA

Anesthesia Machines

- Includes the patented “safety pressure relief valve” standard
- Accepts all types of vaporizers
- 0-4 l/pm precision flow meter
- Sturdy chassis and low center of gravity for extreme stability
- Includes I.V. Pole system
- Adult, pediatric, and non-rebreathing circuits included
- Heavy-duty rebreathing bags included
- Built specifically for veterinary use - includes convenient syringe holder, bag organizers, I.V. Pole, accessories hooks, mounting for evac systems, etc.
- Industry-best 10-Year Warranty
- Made in the USA in our state-of-the-art manufacturing facility
